

**STEVEN D. DREYER, D.C., F.A.C.O.**  
**Chiropractic • Sports Medicine • Rehabilitation**  
**Orthotics • TMJ Syndrome • Nutrition**

2700 W. Coast Hwy., #244 Newport Beach, CA 92663

**Biography**

Dr. Steven D. Dreyer was born and raised in Corona Del Mar, California. Since graduating from the Los Angeles College of Chiropractic in 1987, Dr. Dreyer has been practicing in the Newport-Mesa area for the majority of his 25 years in practice. He completed a three year postgraduate course of study in the highly acclaimed Chiropractic Orthopedics Program and has achieved Diplomate status with the American Board of Chiropractic Orthopedists, a distinction earned by approximately 800 out of the 60,000 licensed practicing Chiropractors in the United States. In 2001, he was also named a Fellow of the Academy of Chiropractic Orthopedists (F.A.C.O.) and is a member of the American College of Chiropractic Orthopedists. Dr. Dreyer is a certified Disability Evaluator and served as a Qualified Medical Evaluator in the State of California for 14 years.

Dr. Dreyer has established a broad-based practice, integrating the benefits of Chiropractic with Integrative Medicine, Nutrition, Physiotherapy Modalities, Massage, Exercise Rehabilitation and Stress Management. He strongly believes in functioning as a patient advocate where the needs of the patient come first. This philosophy dictates that he function within a strong interdisciplinary healthcare team, as he believes that it often takes the differing skills of several cooperating healthcare professionals to provide the most effective health care. This is most obvious in the chronic pain management setting.

Because of his background in Chiropractic Orthopedics and his interest in providing specialty care for complicated injuries such as whiplash and other neck and Back injuries, Dr. Dreyer has been actively involved in the specialized treatment of Temporomandibular Joint Dysfunction commonly called TMJ Syndrome. He has also been providing custom foot orthotics to his patients for the past 22 years and discovered that custom foot orthotics can relieve pain in the feet, ankles, knees, hips and lower back. This unique broad-based combination of therapies has proven very effective in the treatment and prevention of a full spectrum of health concerns and injuries.

From his interest in providing complete health care, Dr. Dreyer has incorporated extensive nutritional counseling, exercise and preventive health care programs into his practice. He provides intensive personal one hour nutritional consultations with functional laboratory analysis incorporated.

Dr. Dreyer has been practicing at Newport Spine & Sport located in Newport Beach, California, for the past 15 years. look for him on the web at [www.stevendreyerdc.com](http://www.stevendreyerdc.com) and "Like" him on Facebook at <http://www.facebook.com/Dr.StevenDreyer>
